

## Nature Canyon Erosion Repair

The Nature Canyon Erosion Repair Project is located predominately in Nature Canyon Park, between Fernbrook Lane and Interstate 494, north of 42<sup>nd</sup> Avenue. Erosion in this area threatened pre-settlement “Big Woods” and an exceptional quality wetland (DNR Public Water 594W), both valuable ecological assets to Plymouth. Improvements included with this project are expansion of storage capacity of an existing water quality pond located in the area as well as the installation of storm sewer piping within the eroded drainageway. Blown compost and a shady seed mix has been placed to restore disturbed areas.
